#### INSTRUCTIONS

## **AUTOMATED FUEL ACCOUNTABILITY WORKSHEET INSTRUCTIONS**

### Press "Print Instructions" Button in the INTRO Worksheet to print these instructions

This worksheet must be run in Microsoft Excel. To use the worksheet, it is recommended that the user copy "FUEL.XLS" to another filename (e.g. JUN96.XLS) prior to data input. This will ensure that the formulas and macros used in the workbook will not be altered, which could result in errors in computations.

EXCEL can be set up to automatically save the file as often as every 1 minute and can be set up to prompt the user before saving. Click on the "Tools" pull-down menu to see if EXCEL has the autosave function in the menu. If not, click on the "ADD-INS" option, then click on the empty box next to the autosave option to add that option to the "Tools" pull-down menu. There are several options available with the autosave function, such as how often you want to save the workbook and whether or not you want the program to save automatically or prompt you first.

This workbook consists of four major worksheets: INTRO, DA 3643, 3644, & 4702-R. Data is entered in the INTRO, DA 3643 and 4702-R. The workbook will then determine daily and monthly totals, allowable losses and actions that must be taken if the account is outside allowable tolerances.

## The following data is entered in the INTRO worksheet:

Month / Report Period / Date of Fuel Report (used on 4702-R) / Post Camp or Station / Voucher Number (used on DA 3644 for Stock Record Accounting) / Name and Grade of Accountable Officer / Name and Grade of Approving Authority / Price per gallon for each type of fuel used.

## The following data is entered in the DA 3643 worksheet:

Number of Pages for the day / Registration Number of vehicle receiving fuel or document number of receipt / Amount of fuel received or issued (entered in the proper column). All other blocks will be filled in by the workbook. When typing in number of pages for the day, enter the number used only on the first page. The others will be transcribed automatically.

## The following data is entered in the DA 4702-R worksheet:

NSN of fuels used / Opening inventory (closing from previous month) / Physical Closing Inventory All other blocks are filled in automatically from the DA 3644 and INTRO worksheet

NOTE: 1st column of DA 4702-R is set up for an allowable loss of 0.01. If the fuel is other than MOGAS or JP-4, the allowable loss/gain must be adjusted to reflect 0.005. It is recommended that only advanced users of EXCEL make changes to basic functions such as this in the program.

FUEL ACCOUNTING
